Preparing for the PSAT 10, PSAT/NMSQT, or SAT

These courses are designed to help students prepare for specific aspects of the SAT reasoning test, PSAT 8/9, PSAT 10 or PSAT/NMSQT. Each course is adaptable to your selection where applicable. Each course comes with customer satisfaction guaranteed.

SAT Mathematics

This course is designed to help students master the mathematics section of the College Board's SAT reasoning test. Emphasis is on test-taking and problem-solving strategies, but we do not simply 'teach to the test'. Foundational structures of Problem Solving and Data Analysis, Heart of Algebra, Passport to Advanced Math, and Additional Topics are developed from fundamental principles.

SAT English

This course is designed to help students prepare for the SAT Evidence-Based Reading, Writing and Language exam. We emphasize the importance of structured reading, time management, text markup, and standard skills review. Key test concepts: Expression of Ideas; Words in Context; Standard English Conventions; Command of Evidence. Many practice exercises and drill work with instructors.

SAT Essay Training

This course is designed to help students sharpen their skills in responding to SAT writing prompts. Emphasis is on style considerations, attention to details, responding to EXACTLY what is being asked, time management, planning and organization of materials. Intended mainly for SAT students, it can also be taken by students in 9th or 10th grade for improvement of timed writing.

SAT Complete

This course includes all preparatory materials for the SAT. It covers in detail techniques for strong performance in the SAT Mathematics and SAT Evidence Based Reading, Writing and Language exams. This course is intended for those planning to respond to the Essay section as well and includes our essay training materials. Emphasis is on fundamentals and mastery of Common Core base for SAT assessment items.

SAT Prep without Essay

This course is exactly the same as our SAT complete, but it is intended for students who do not wish to prepare for the essay portion. All other materials for SAT Math and English preparation are included and instructional program follows the same guidelines.

SAT Training Math and English

This course is designed for those who have already completed one of our more in depth courses and are now interested in sharpening their test-taking skills through many practice exams and problems. These are intended as "coaching" sessions designed to help students practice using fundamental skills *already* mastered.

Preparing for the ACT Exam

These courses are intended for those students who prefer the ACT admissions test. It features an additional Science reasoning section not found explicitly on the SAT.

ACT Mathematics

This course is intended to help students prepare for all the areas they will encounter on ACT Math. Topics include prealgebra review, algebra and functions, geometry in the plane, coordinate geometry in 2 and 3 dimensions, number sense, complex numbers, theory of equations, verbal problems—their representations and interpretation, charts and graphs.

ACT English

The English sections of the ACT exam cover high school critical reading and writing. This course is intended to review rhetorical techniques, conventional grammar and sentence structure, stance, main idea, author's point of view and sentence completion guidelines. Strong writing skills are emphasized in preparation for reading sections in both English and Science.

ACT Science Readiness

This course focuses on basic preparation for the ACT Science reasoning section. Topics include, time management, structure of the Science section, basic science knowledge helpful for success, interpretation of charts and graphs, comparative reading, command of evidence, interpretation of experiments and design, inference and deduction, logical arguments.

ACT Essay Training

The ACT Essay is an optional section featured by ACT. Students planning to write responses to the new prompts (revised in 2015) will be required to submit a substantially sound piece of analytic narrative for a strong score. Topics include planning, time management, response accuracy, stance, audience, brevity, completeness, literary style.

ACT Complete

This is a rigorous comprehensive course intended to help students develop mastery of all areas of the ACT Exam. Extensive problem solving and guided practice will be provided through each of the four areas featured separately in our program. Highly recommended for students new to standardized tests with little or no experience with SAT or PSAT.

ACT Prep without Essay

This is a rigorous comprehensive course intended to help students develop mastery of all areas of the ACT Exam. Extensive problem solving and guided practice will be provided through the Mathematics, English, and Science Reasoning areas of the test. Highly recommended for students new to standardized tests with little or no experience with SAT or PSAT.

ACT Training

This is a training course intended to give students additional practice in Math, English and Science for the ACT Exam. It is not intended to be a comprehensive package, but rather a series of guided practice exercises where students can further apply the skills they have mastered in these areas.
