
Chief Innovation Officer

Inspirational Leadership | Problem-Solving | Data Analysis | Public Speaking | Networking
Operations Research | Mathematical Modeling | Software Development | Teaching & Training

A visionary leader and senior executive with extensive experience transforming innovative ideas into effective technological solutions, particularly in startups and educational IT. Maximize business operations and performance, driving impactful projects, creating scalable software solutions, and addressing critical issues such as sustainability and resource management. Expert in full-stack development and proficient in multiple programming languages. Adept at translating complex concepts into actionable strategies.

Skilled communicator and inspirational leader with strong problem-solving abilities and effectual collaboration skills. Passionate about fostering talent across cross-functional teams. Serve as a liaison between engineering, leadership, stakeholders, and consumers. Promote workplace cultures of growth and excellence, support others in developing career paths, and inspire and unify teams. Aggressive in leveraging a profound expertise in data analysis, software engineering, and operations research with a forward-focused approach and robust effort.

Career Experience

Thoughtmuseum Solutions

2015-Present

A consultancy specializing in IT and software solutions, education technologies, and academic preparation.

Founder, CEO

Engineered and optimized core LMS technologies, integrated supplementary full-stack MERN applications and crafted diverse blog and e-commerce applications.

Featured Clients and Projects

ZapOne Solutions, San Francisco, CA

Current

Delivering software engineering and web support.

Provide guidance to aid the development of North American operations involving web-based technologies, including minimum viable products, technology stacks, AWS hosting, scalability, product deployment, and marketing support. Frame the scope for and oversee projects from inception through deployment to maintenance and hosting. Report to CEO and CTO.

- **Opened a new \$200,000/year U.S. revenue stream** by forging a working relationship with Heart City LLC.
- **Saved \$100,000+ annually** for the client by combining engineering contributions with consulting services using profit-sharing models.

Heart City LLC, San Francisco, CA

Current

A social media app startup.

Guided monetization of a large social media code base by networking engineering teams in India, Silicon Valley, and Southern California, creating and testing the MVP and refining the results for presentation to investors and stakeholders. Answer to founding partners.

- **Preserved \$150,000+ of investors' initial contributions** by personally reviewing the legacy code base and incorporating appropriate professional resources, thereby bringing functionality to a dormant code.

Navibuilder Building Intelligence LLC, Carmel Valley, CA

Current

A web-based solution for the construction industry.

Devise and implement online marketing strategies and deliver continuing strategic advice and support. Forge and maintain stakeholder relationships to best understand client needs and challenges. Direct research to evaluate digital marketing project adaptation. Assess the performance of outside development teams and the value of third-party marketing resources. Accountable to the founder and CEO.

- **Reduced annual spending \$120,000+** by demonstrating inefficient strategies and expenditures revealed through analyses using AI and other data-driven models.
- **Avoided \$70,000[±] in operational expenditures** by leveraging profit sharing for outsourced services.

Illumin Education, Santa Clara, CA

Current

A consulting firm providing college admissions counseling.

Academic Instruction Specialist

Providing online coaching and academic instruction supporting mathematics, physics, computer science, and statistics. Provide guidance and support to students preparing for GRE, SAT, ACT, and TOEFL tests. Report to the founder and CEO.

- **Contributed to client ranking in the top 7%** of industry competitors by driving customer support services, including advanced mathematics, computer science, physics, GRE, SAT, and ACT test prep instruction.

Global Brands Management

2019

A brand licensing and product management services firm.

Education Technology Consulting

Assisted English language learners in preparing for transition into U.S. schools by developing curricula based on California Common Core. Researched Chinese families participating in the H-1B visa program. Kept the President and CEO apprised of progress.

- **Coaxed \$1.5 million from investors** by providing insights into the market value and potential of an application that grew into the iQ3R project.
- **Boosted website traffic 70%** by composing monthly “infomercial” research papers and webinars on topics covering blockchain technology, education applications, and the future of online education.

BEEC, Danville, CA

2020-2021

Providing comprehensive tutoring and test prep services to students worldwide.

Chief Information Officer & Director of Education

Hired to create and implement, with the assistance of 12 developers and software engineers located in Poland and Germany, the online, integrated core, Go LMS, and Scheduling Hub products that performed scheduling, video conferencing, and administrative tasks. Introduced a framework that organized online curricula and matched instructors with students. Reported to the president of sales and operations.

Resolved hosting and server issues to generate the site reliability needed for holding synchronous meetings worldwide. Drafted procedures and legal standards for online educators’ appearance, diversity, earnings, and performance. Recruited and trained 15 staff for K-12 education and standardized test preparation. Recorded a 200-point average increase in SAT scores. Experienced zero teacher turnover or student complaints.

- **Generated \$800,000 in new revenue in eight months**, still a sales record, by ensuring the latest product features offered persuasive value and driving a timely and impactful deployment.
- **Trimmed \$150,000+ from overhead costs** due to the efficiency of the in-house LMS, allowing the use of part-time administrative personnel.

iQ3R Education Technologies, San Mateo, CA

2017-2020

An educational consulting firm and supplier of an online international academic syllabus.

Chief Information Officer, Curriculum Coordinator, Product Manager

Headed a 15-person international research team in developing and deploying custom learning-management systems for international clients. Steered business development initiatives and drafted proposals for Chinese investors utilizing translations, presentations, and details on branding, design, and marketing.

Joined with Global Brands Management to integrate core technology and testing procedures and designed student and instructor interaction. Contributed to adapting common core courses to online use. Allocated a \$1.5 million budget. Reported to the president and chair of global brands management.

- **Recorded ≈\$6,000/day in average sales** by creating and fielding an LMS with the appeal to convince students to sign up at \$150/hr.

Think Tank Learning, Santa Clara, CA

2011-2015

A forward-thinking educational development company focused on college admissions consulting and academic instruction.

Chief Instructor & Product Management

Cooperated with a 20-person staff on recruiting, training, and continuing education of 200+ part-time instructors. Promoted attractive career opportunities by facilitating staff events. Formed alliances with publishers of common core materials and pursued accreditation. Designed and chaired seminars and community events. Controlled a \$120,000 budget. Served as a member of the teaching operations manager's team.

- **Produced \$16.2 million of net revenue** in two years by designing products attuned to student preferences, formulating personalized learning plans, reinforcing student access to top-quality common core materials, and making tutoring services accessible to a much broader demographic.
- **Took up to 75% out of the operating charges** per student by piloting the installation of a structural model that allowed the assignment of three or four students to a single instructor.
 - The change doubled hourly revenue, driving a 10% increase in teacher pay and a 30% shrink in instructor turnover.

Product Design – SAT, ACT, AP

2011-2015

Managed 12 associates and a team of 70 in formulating comprehensive test preparation courses. Conceptualized, authored, and disseminated curricula to 13 locations and trained the instructors. Performed intensive research on SAT changes. Initiated quality assurance metrics and version control protocols. Hosted summer seminars on data science and computing. Administered a \$120,000 budget. Reported to the teaching operations manager and CEO.

- **Wrung \$5.6 million from four years of operating costs** by saving an average of \$500 per student through utilization of in-house curricula.
- **Responded to industry uncertainty about SAT** by facilitating conversions to ACT. Scored an average improvement of 26% in ACT results and 20% in SAT grades.

Additional Experience

Subject Expert Instructor (Mathematics & Economics), BASIS Independent, Fremont, CA 2024–Present
Architect and deliver advanced STEM and business curricula across Linear Algebra (Honors), Precalculus, and Principles of Business & Economics within a high-performance academic environment. Drive instructional design, assessment strategy, and student outcomes through rigorous, systems-oriented course development.

- **Designed and deployed full-course frameworks**, including original assessments and instructional materials, emphasizing abstraction, modeling, and analytical rigor.
- **Built scalable instructional systems** leveraging LaTeX, Desmos, and data-driven tools to standardize delivery and elevate student performance.
- **Lead DECA preparation initiatives**, coaching students in business analytics, financial strategy, and competitive presentation—bridging academic theory with real-world application.

Computer & Technology Instructor, St. Matthews School, San Mateo, CA

2024

Teach coding, computing, and keyboarding to 650+ K-8 pupils.

Earlier Experience includes portfolio manager with Whitcraft Capital (Smith-Barney), supply chain manager & consultant for T3Ci, and a content developer & teacher for Flex College Prep

Education & Professional Development

University of California at Berkeley
Master of Arts in Mathematics (PhD Candidate)
Bachelor of Arts in Mathematics

UC Berkeley, **Web Developer Bootcamp & Full Stack MERN Developer**

Technical Proficiencies

Zoom, Teams, Google Workspace & Classroom, Microsoft 365, SQL, Linux, Node, Windows, iOS
PostgreSQL, MySQL, MongoDB, Amazon Web Services, Spark, Hadoop, Cassandra, Git & GitHub, Node.js,
Express Server, GraphQL, Apollo Server, Next.js, MATLAB
Languages/Frameworks: Python, iPython Notebook, Java, JavaScript, HTML, CSS, R, LATEX, React,
DjangoData
Science: Regression, Support Vector Machines, Naive Bayes, K-Nearest Neighbors, Decision Trees, Cluster
Analyses, Permutation
Demonstrated proficiency in progressive web apps, refactoring methodologies, API utilization, and
implementation of efficient program designs.
